## Why true analyse ?

True analyse business solutions pvt ltd has a motto of making your business grow. We know IT is driving the present generation. So we have a vision of making trueanalyse - one of the premier Software Development Service Company in India and a one stop solution for all your IT related needs, be it Software Services, Web Solutions or Mobile Solutions.

Whether you are looking for software development solution to increase the capacity of your existing team or want to make your vision a reality, trueanalyse has a model with which can be tailored to fit your requirements.

When your business needs solution, trueanalyse technology strategists are ready. Our strategist have a deep understanding and practical experience with the latest technologies. We work with you to understand your strategic business objectives and develop an actionable, custom software development plan to drive your business through uncharted territory and on a path to capturing market share and driving revenue.

## Vision

Our vision is to develop in a constant manner and grow as a major IT service provider to become a leading performer, in providing quality Web, Mobile and Desktop software development solutions in the competitive global marketplace.

Our professional, flexible and integrated process reflects in what we do. We always guide our customers to success. We have the ability to accelerate and quickly share the great work or products of your organization or business.

## Mission

Our mission is to enhance the business growth of our customers with creative Design and Development to deliver market-defining and high-quality solutions that create value and reliable competitive advantage for our customers around the world.

## Price and Quality

At trueanalyse you will meet world class products with affordable prices. Reliable offshore software development is one of our prime highlights. We assure you products which fit exactly to your requirements developed and delivered in a timely manner. We are truly a customer-centric organization.

## Workflow

The variety of projects has brought about a wide range of engagement models, working schemes and types of workflow. At trueanalyse, we provide each project with an individual workflow - everything works in the way most convenient to the customer. We are flexible and have enough experience to implement almost any scale of project sought by the customer.

## Web App Development

True analyse is one of the top-notch software development companies that deliver the best ever web applications to clients across the world. Our enterprise web applications help organizations to achieve operational excellence and superior customer service. We have a team of professional web developers who are keen enough to meet any of your challenging requirements. Their significant expertise in various prominent frameworks helps you to build promising web applications for your enterprises.

Our services include the latest technologies such as **ASP.NET MVC, Angular JS, PHP, .NET Core, SQL Server, MySQL, and Oracle.**

## Mobile App Development

Being a trusted technology partner, we help our clients to overcome their business challenges with perfect enterprise mobility solutions. As a complete customer-driven company, Trueanalyse always delivers highly customized services. We have dedicated service personnel and developers who are ready to explore any unknown realms to provide you an excellent app solution. Also, our development team includes highly experienced professionals across all verticals of mobile app development. The major platform that we handle includes Android Native, iOS Native, Xamarin and ngCordova.

## Cyber Security

True analyse cyBenSec (a division of true analyse business solutions llp ) is one the leading and fastest growing Cyber Security Service & Solution company providing Vulnerability Assessment & Penetration Testing, Security Testing, Assessment & Consultancy, Security Audit, Research and Development, Enterprise Security Solution Implementation ( SIEM, SOC, IDS/IPS/UTM, Threat management system), DLP -Data leakage Protection, AI - Intelligence Security, Bigdata Security, IOT Security , Risk management etc.

## UI / UX Solutions

According to us the greatest learning comes from customer inputs. As a UI/UX solutions provider, we always start from the customer side, So that we are always eager to hear from our clients. Once the requirement is clear to us, then the next phase of activities begins. It includes creation of wireframes, workflows and prototypes. Such vibrant interactive sessions leads to the formation of a really intuitive UI/UX solution. To make it a wonderful journey, we have a very competitive development team with us. Our UI/UX development services include frameworks such as HTML5, CSS 3, SASS, Bootstrap and Material.

## Cloud Solutions

The vast working experience in new age technologies has helped us to become a quality cloud solutions provider. We believe that using proven methodologies and deep research, any app can be scaled up onto a cloud platform. Being an active advocate of cloud-based solutions, we have build apps that accelerate productivity and reduce development costs dramatically. With every step of deployment, our expert team members will assist you and in forming a highly customized cloud solution for your organization. With our diverse knowledge of cloud-based apps, customers can experience a seamless, safe, and rapid cloud migration and thereby improve overall business performance. Now with true analyse, explore the limitless possibilities of cloud solutions.

We provide services in **Azure, Amazon AWS, Mongodb, Node JS, Google Cloud**

## Digital Marketing

At a high level, digital marketing refers to advertising delivered through digital channels such as search engines, websites, social media, email, and mobile apps. While this term covers a wide range of marketing activities, all of which are not universally agreed upon, we'll focus on the most common types such as **Paid Search, Content Marketing, Email Marketing, Mobile**

## Tunning Spot

### A Complete Captive Portal Management Solution

Tunningspot is a petition that is in charge of controlling and managing the entry of users to public and private networks in a programmed way. Tunningspot are often used in open-access networks available in stores, malls, clinics, airports, supermarkets, and corporate networks, for guest entry management. Tunningspot portal allows administrators to allow access to the internet by passing on data that provide user identification such as name, e-mail, phone number, or authentication by using a voucher.

## Flow Chart

- End users after connecting to the network, when trying to access any site using any browser; will be redirected to a customized login page
- Upon entering the login credentials which is provided to the end user by the host through a preprinted coupon; they will be able access internet under a particular plan
- While intruders would be prevented from accessing the internet
- Host can create any number of plans in Tunningspot based on time, bandwidth and data.
- Host can create any number of coupons under any plan
- Tunningspot will be keeping end user's web access history to help host to comply with the law of land when providing internet to customers
